EMS REHABILITATION PRESCRIPTION

For Those Who Cannot Exercise.

MOVEMENT FOR A HEALTHIER FUTURE

YOUR PATH TO A VINRANT & ACTIVE LIFE

HISTORY

VISION

HEALTH

Presenting a Life of Smart Healthcare Where Everyone Can Enjoy a Healthy Life

Despite the enrichment of our lives through technological advancements, health is being adversely affected. To address this, Core Movement provides smart healthcare solutions that surpass conventional healthcare.

EMPATHY

We highly value the connection with customers through communication, empathy, and responsiveness.

Core Movement transforms discomfort into convenience through empathetic customer engagement. Our systematic production and inspection processes minimize discomfort while we explore practical solutions for enhanced convenience.

CHALLENGE

Perpetually researching better and healthier solutions.

We analyze diverse groups including the elderly, vulnerable populations, and office workers. We are currently engaged in collaborative research with domestic and international experts and acquiring safety certifications to provide hydrotherapy healthcare solutions that are both safe and highly effective.

OBSERVE

Observe from various perspectives, including the situation, actions, motivations, and provide solutions.

We observe various lifestyles and perspectives of our customers and release a diverse range of products considering them. From training suits that aid in strength exercises to EMS bathtubs designed for aquatic rehabilitation, Core Movement continuously researches solutions with a broader perspective.

VERIFIED COMPANY

Core Movement focuses on safe and effective EMS services, backed by certifications from various domestic and international agencies (KC, CE, FCC, etc.). Their patented product-centered technology ensures high stability. This stability and brand value have led to recognition as a promising export company, achieving success both domestically and internationally.

Patent & Certification

RESEARCH & IMPROVEMENT

For reliability and expertise, we collaborate with specialized institutions in various fields for validation, research, and development

Publication of SCI-level papers utilizing our products
(Silla University Industry-Academia Coop Office: Physical Education Dept)

EMedical clinical trial with IRB approval using ELMUS AQUA product
(Yongsan Pusan National University Hospital Rehabilitation Medicine Dept)

Research on Aquatic Rehab Exercise Program Combined Aerobics and EMS
(EMS Training Academy Korea / Aqua Lap / Hanmae Welfare Center)

8-week research on Hydrotherapy Rehab using our product for validation
(Busan GoWoon Clinic)

RCT for People with Disabilities

Research and VE of Exercise Programs

EMS?

 [Electrical Muscle Stimulation]
Microcurrent stimulation therapy for muscle activation, contraction, and relaxation

Voluntary muscle contraction

Brain ▶ Spinal Cord (Central Nervous System) ▶ Motor Neurons ▶ Muscle Contraction

- = Potential difference between cell membranes ▶ Generation of action potential
- ▶ Signal transmission through neurons ▶ Motor nerve action ▶ Muscle contraction

Involuntary Muscle Contraction

Electrical stimulation ▶ Motor neurons ▶ Muscle contraction

- = Microcurrent stimulation ▶ Excitation of nerve cells ▶ Generation of action potential
- ▶ Signal transmission through neurons ▶ Motor neurons ▶ Muscle contraction

Heavy lifting
Increased Risk of Injury

NORMAL TRAINING

Bodyweight exercise
(Full-body strength training)

EMS TRAINING

EFFICIENT AS WELL

Traditional training with weights can strain joints and risk injury due to poor posture and balance. EMS training, utilizing microcurrent-induced contractions, offers effective strength exercises without heavy weights. It minimizes joint strain while enhancing energy consumption and muscle activation through simultaneous engagement of muscle fibers. EMS training is a recommended, efficient method for overall fitness.

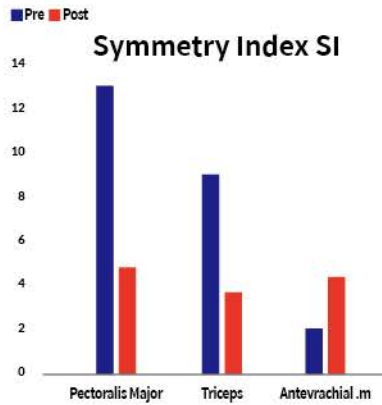

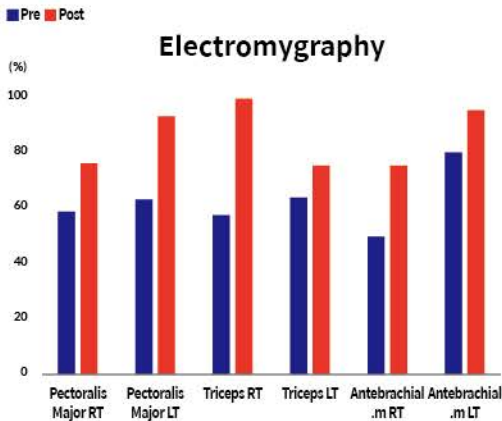

THE FIRST IN THE WORLD

HYDRO THERAPY EMS PRODUCT

Empirical evidence on muscle strength increase

The Effects of 8 Weeks of Electromyostimulation Training on the Upper Body - Muscle Activity and Respiratory Gas Analysis in Athletes with Disabilities / Jongbin Kim, Junsung Park, Myungchul Kim (2022)

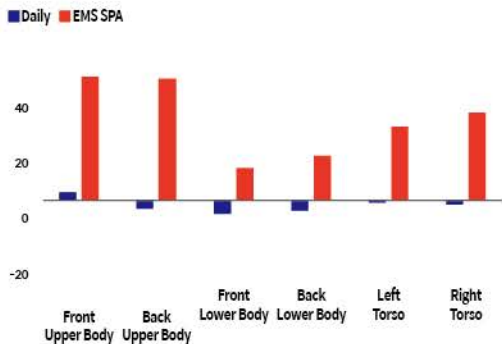

Muscle Activation (Pectoralis Major, Triceps, Biceps) Significant Increase Observed

※ Promotes cardiovascular health and energy expenditure

Empirical Comparison of Everyday Life and EMS Spa Usage

Healing Spa · Rehabilitation Healthcare Field Evidence-Based Support Project Report (EMSSPA) by Healthcare Spa Industry Promotion Institute (2021)

Muscle Function Increase Rate Compared to Daily Life

Region	Daily	EMSSPA	Region	Daily	EMSSPA
Front Upper Body	4.1%	46%	Front Lower Body	-0.4%	11.3%
Back Upper Body	-2%	46.3%	Back Lower Body	3.5%	13.8%
Left Torso	-2%	27.5%	Right Torso	-1.9%	36.1%

EMS TRAINING Effects

Key Effects and Benefits_Top 5

Strength Increase

Efficiently strengthens muscles by targeting core muscles and managing overall strength effectively.

Body Fat Reduce

Raises basal metabolic rate via muscle maintenance, promoting calorie burning and aiding in fat reduction.

Pain Relief

Skin-delivered electrical stimulation enhances oxygen intake, promoting tissue healing and nutritio.

Balance Improve

Corrects body imbalances, reduces discomfort from muscle imbalances, and establishes balance.

Bone Density increase

EMS boosts protein synthesis, muscle contraction, and bone pressure, improving bone mass.
