HEALTHY PLEASURE IN YOUR LIFE

# MOVEMENT

---

"Core Movement" was established with the conviction of addressing the health issues of busy modern individuals. Our goal is to cultivate a content and joyful life through well-being. Most importantly, we are dedicated to attentively heeding our customers' feedback and realizing their needs in the utmost effective ways.

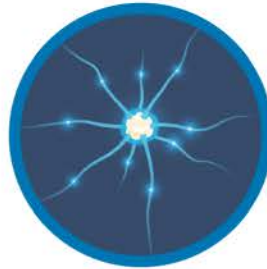

# EMS?

[Electrical Muscle Stimulation]  
Microcurrent stimulation therapy for muscle activation, contraction, and relaxation

### Microcurrent Stimulation

Microcurrent is delivered via EMS pads and conductors (underwater)

### Motor Nerve Activation Within the Body

Direct motor nerve activation through microcurrent stimulation

### Facilitation of Muscle Contraction

Involuntary muscle contraction induced through motor nerve stimulation

Heavy lifting Increased Risk of Injury

**NORMAL TRAINING**

Bodyweight exercise (Full-body strength training)

**EMS TRAINING**

## EFFICIENT AS WELL

Traditional training with weights can strain joints and risk injury due to poor posture and balance. EMS training, utilizing microcurrent-induced contractions, offers effective strength exercises without heavy weights. It minimizes joint strain while enhancing energy consumption and muscle activation through simultaneous engagement of muscle fibers. EMS training is a recommended, efficient method for overall fitness.

The Effects of 8 Weeks of Electromyostimulation Training on the Upper Body - Muscle Activity and Respiratory Gas Analysis in Athletes with Disabilities / Jongbin Kim, Junsung Park, Myungchul Kim (2022)

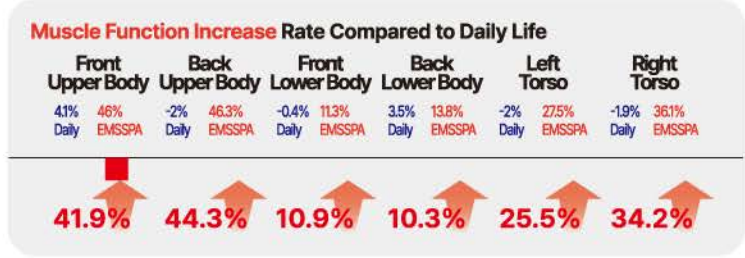

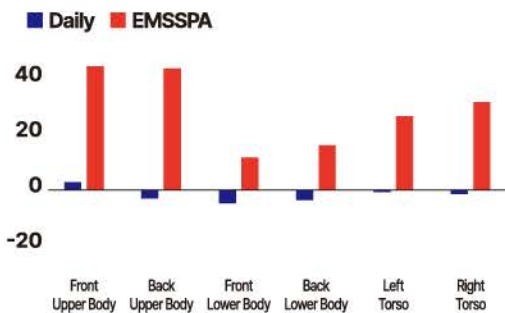

**Muscle Activation**  
(Pectoralis Major, Triceps, Biceps)  
**Significant Increase Observed**

※ Promotes cardiovascular health and energy expenditure

## Empirical Comparison of Everyday Life and EMS Spa Usage

Healing Spa · Rehabilitation Healthcare Field Evidence-Based Support Project Report (EMSSPA) by Healthcare Spa Industry Promotion Institute (2021)

## EMS TRAINING EFFECTS

Key Effects and Benefits\_Top 5

### Strength Increase

Efficiently strengthens muscles by targeting core muscles and managing overall strength effectively.

### Body Fat Reduce

Raises basal metabolic rate via muscle maintenance, promoting calorie burning and aiding in fat reduction.

### Pain Relief

Skin-delivered electrical stimulation enhances oxygen intake, promoting tissue healing and nutritio.

### Balance Improve

Corrects body imbalances, reduces discomfort from muscle imbalances, and establishes balance.

### Bone Density Increase

EMS boosts protein synthesis, muscle contraction, and bone pressure, improving bone mass.

# ELMUS PRO MAX

Professional Rehabilitation body care bathtub

## ABOUT PRODUCT

Versatile for all body types, from athletes to the general public. Ergonomic design allows comfortable use in rehabilitation and muscle strengthening programs.

## FEATURES

Our bathtub product offers an efficient EMS experience with independent muscle control through an analog stand-type controller and ergonomic design, minimizing strain for users.

Training

Beyond full-body care, our enhanced user experience includes an ergonomic bathtub design that reduces strain, ensuring greater comfort during bathing.

### Full-body muscle care for 12 different areas

Arms, Trapezius, Lats waist, Abs, Sides, Upper and lower glutes, Right and left thigh, Side thigh and calves. (Abdomen + obliques connected with a separate band).

### Compliant with National Safety Standards

Safely transmits low voltage microcurrent at DC 24V through external adapter.

### 18 Modes

Supporting a wide range of health management modes for professionals. ( 3 levels for each mode )  
\* Massage, Stretching, Cardio, Strength, Recovery, Relaxation

### 12 Channels, frequency bandwidth of 150Hz

Enhanced circulation & metabolism with low frequency support, targeting deep muscle.

### Experience a Gravity-Free Spa with Ergonomic Design

Experience gravity-free comfort, soothing warmth, and anticipate mindful relaxation and enhanced metabolism.

### Delicate Body Balance Care

26 Care points for balanced body alignment, precise core muscle care for optimal balance.

### Intuitive Real-Time Customization

It is easy to use with an intuitive operation method and can be adjusted in real-time according to the customer's desired stimulation even during use

**Specifications of Bath** | Size : 1850 X 910 X 710mm / Weight : 85kg / Color : White / Material : Ceramic (Conductor-Stainless Steel)

**Specifications of Device** | Size : 312 X 363 X 60mm / Weight : 3.5kg / Color : Black / Case Material : Aluminum + Acrylic

Power Consumption: +24V=6.25A 150W / Rated Voltage : 100-240V~50 - 60Hz 2.1 A

# ELMUS PRO

Rehabilitation body care bathtub

## ABOUT PRODUCT

Professional-grade advanced product with safety features like emergency stop button, wide frequency output for effective rehabilitation and muscle strengthening.

## FEATURES

Designed with analog controls for quick and intuitive operation, the 12-channel standalone controller allows independent adjustment of each muscle in the body, delivering the optimal EMS experience for the user.

# Smart choice for your healthcare

The choices you make 'now' will shape  
your 10 years to come.

In this age of centenarians, we must focus not only on alleviating health  
complaints but also on prevention.

As the saying goes, "a lot can change in a decade".

The impossible is now part of our daily lives.

Core Movement is here to transform your health, turning the impossible  
into a healthier decade.
